DETAILED ACTION***Drawings***

1. The drawings filed on October 21, 2003 are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "27" has been used to designate both the controlling element and the sphere. Apparently, the reference character "272" should refer to the sphere. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: (A) It would appear that the word "leaves" (page 4, line 4) should be changed to --leaving--. (B) A period should be inserted between "(40)" and "Thus" (page 7, line 17). (C) The word "heat" (page 7, line 23) should be changed to --head--. Appropriate correction is required.

Art Unit: 1724

Allowable Subject Matter

3. Claims 1-10 are allowed.

4. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach or fairly suggest the recited vapor cleaner with the recited mainframe, mainframe hole, mainframe recess, control pump, nozzle assembly, heater, detachably connected reservoir, locking device, spring driven hooking member, multiple cutouts, L-shaped plate, and multiple engaging plates in the recited positioning and operative relationship.

Conclusion

6. This application is in condition for allowance except for the following formal matters:

The drawings and specification must be corrected as noted respectively above in paragraphs 1 and 2.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Art Unit: 1724

7. The prior art made of record is considered pertinent to applicant's disclosure. These references have been cited as art of interest to show other vaporizers and/or cleaners.
